

Robust roots recover the nutrients... already in your soil

Stimulate™ Increases Root Mass for enhanced yields!

**Dramatic
& visible results.**

For years you've invested in nutrients and fertilizers in an effort to increase yields. Fact is, your crops have only used a portion of the inputs you've applied.

But plants with a robust root system can effectively capture the nutrients and fertilizers applied in years past. Research proves that Stoller's Stimulate™ increases root mass by more than 200%.

Stimulate promotes vigorous roots with new and continuously growing root tips that are vital to enhanced nutrient uptake. Only new root tips effectively "grab" the available nutrients and moisture for improved plant health and enhanced crop yield.

So you control input costs and enjoy enhanced yields.

For more information on Stimulate™ or other Stoller products that will maximize a plant's genetic expression go to www.stollerusa.com or call 800-539-5283.
