# ARRAY<sup>®</sup>

## “STILL THE STANDARD”

Array has proven it's quality and performance benefits for more than a decade, as a Target Performance Adjuvant that increases the deposition, retention, canopy penetration and increases performance of post applied pesticides.

## BENEFITS

improved retention of spray	(less bounce)
improved spray pattern quality	(keeps spray on target)
improved canopy penetration	(better coverage)
improved performance	(all of the above)

'puts spray there and keeps spray there'

## KEY PRODUCTS

Roundup™ WeatherMax, Roundup™ PowerMax, Touchdown™, all glyphosate brands, Status™; meets or exceeds the nitrogen requirements for most all pesticides

## USE RATES

Ground and Aerial Applications  
9 lbs. per 100 gallons of water

## PACKAGING

9 pound bags	200/pallet	1,800 pounds
45 pound bags	40/pallet	1,800 pounds
1,000 pound bags	2/pallet	2,000 pounds

## NOTES

Array may be used as a substitute for nitrogen requirements.  
9 lbs./100 gallons = 8.5 (1%) lbs. AMS/100 gallons.

Array meets or exceeds the 17 science and technological benchmark standards set by the Chemical Producers & Distributors Associations for quality.
