

Cloak™ EX

Herbicide

Cloak™ EX contains chlorimuron and tribenuron methyl, the active ingredients used in Canopy® EX.

Cloak™ EX Beats Weeds for Clean Fields

Stay ahead of weed problems with Cloak™ EX herbicide. Cloak EX controls tough weeds like henbit, marestail and pigweed. Plus, Cloak EX offers powerful residual control to keep your fields clean and reduce early-season weed competition to help maximize yields.

Cloak EX fits perfectly in no-till or conservation tillage fields. It can be applied from fall through early spring for burndown of winter annuals and perennial weeds so you are ready to plant once conditions allow.

KEY PERFORMANCE BENEFITS

- Helps maximize yield by providing outstanding control of tough broadleaf weeds
- Fall applications keep fields clean until planting
- Offers burndown and residual activity
- Flexible application options: no-till, reduced-till, stale seedbed or conventional production
- Adds second mode of action in glyphosate programs
