

Diablo®

SELECTIVE HERBICIDE

Excellent Control Where You Need It.

Diablo® is a water-soluble amine formulation of dicamba that offers excellent control of tough broadleaf weeds, vines and brush in a variety of crop and non-crop settings. Diablo is an excellent stand-alone or tank-mixed herbicide that provides fast knockdown and residual control. Diablo mixes well with glyphosate herbicides for enhanced performance and resistance management.

DEPENDABLE CONTROL OF BROADLEAVES, VINES AND BRUSH

- Control of tough weeds including kochia, Russian thistle, pigweed, mustards, prickly lettuce, lambsquarters, knotweed and many other annual and perennial broadleaf weeds
- Systemic product with residual soil activity
- Non-toxic to microorganisms
- Noxious weed and brush control
- Tank-mix compatible with many other herbicides

EPA REG. NO. 228-379

ACTIVE INGR. dicamba (49.41%)

FORMULATION liquid

CHEM. FAMILY benzoic acids,
phenoxyaliphatic acid

GROUP NO. 4

MODE OF ACT. synthetic auxin

SIGNAL WORD caution

RESTRICTED no

PACKAGE SIZE 2 x 2.5 gal, 30 gal

Diablo®

SELECTIVE HERBICIDE

KEY USES

Roadsides, railways, rights-of-way and industrial sites, hay, rangeland, farmstead fallow, and other non-crop areas and turf

KEY WEEDS CONTROLLED

(See product label for complete list)

ANNUALS:

Beggarweed, Florida
Burdock
Chickweed, common
Henbit
Jimsonweed
Knotweed
Kochia
Lambsquarters
Lettuce, prickly
Morningglory
Mustard; tansy, wild
Pigweeds
Puncturevine
Ragweed; common, giant
Shepherd's-purse
Smartweed
Thistle
Waterprimrose, winged

BIENNIALS & PERENNIALS:

Burdock
Chicory
Geranium, Carolina
Hawkweed
Horsenettle, Carolina
Knapweed; black, Russian
Nettle, stinging
Plantain, buckhorn
Ragwort
Sowthistle
Spurge
Starthistle
Vetch

WOODY:

Birch
Elm
Grape
Kudzu
Maple
Olive, Russian
Spruce
Willow

APPLICATION RECOMMENDATIONS

The product can be applied using water, oil in water emulsions including invert systems, or sprayable fluid fertilizer as a carrier. A compatibility test should be made prior to tank mixing.

This product may be applied broadcast using either ground or aerial application equipment, apply 3 to 600 gallons of diluted spray per treated acre. Volume of spray applied will depend on the height, density, and type of weeds or brush being treated and on the type of equipment being used. When using aerial equipment, apply 1 to 40 gallons of diluted spray per treated acre in a water-based carrier.

This product may be applied to individual clumps or small areas (spot treatment) of undesirable vegetation using hand gun or similar types of application equipment. Apply diluted sprays to allow complete wetting (up to run-off) of foliage and stems.

Herbicide adjuvants or other spray additives (emulsifiers, surfactants, wetting agents, drift control agents, or penetrants) may be used for wetting, penetration, or drift control. Spray additives must be agriculturally approved when used in pasture applications. If spray additives are used, read and follow all use recommendations and precautions on product label.

Diablo® may be tank mixed with one or more herbicides such as Razor®, Trooper™ P+D, Tahoe®, or Patriot® for control of grasses, additional broadleaf weeds, and woody brush and vines.

Retreatments may be made as needed, however, do not exceed a total of 2 quarts (2 lbs a.i.) of Diablo per treated area per year.

Animals cannot be removed from treated area for slaughter prior to 30 days after last application. No waiting period between treatment and grazing for non-lactating animals.

See label for complete application rates and recommendations.
