

ENCOMPASSTM

herbicide

Encompass offers consistent preemergent control of yield-robbing broadleaf weeds like:

waterhemp *pigweeds* *nightshade* *morningglory*
c. lambsquarters *c. ragweed* *kochia* *prickly sida* *to name a few...*

Encompass also offers preemergent suppression of :

giant ragweed *R. thistle* *velvetleaf* *barnyardgrass* *foxtails*
crabgrass *goosegrass* *copperleaf* *to name a few...*

- Excellent PRE for Roundup Ready[®] soybeans – controls the weeds before impacting yields.
- Dependable and reliable control of resistant weeds – ALS, triazine, and glyphosate rate tolerant species
- Rotational flexibility – 30 days for corn, sorghum, wheat

Use Rate: Encompass should be used at 2 to 3 ozs/A in soybeans.

- Encompass is a PPO inhibitor that is active in the soil.
- Formulation is an easy-to-use WDG, package in 4 x 5 pound jugs, 20 pounds in a case, 480 pounds/pallet.
- Encompass contains the active ingredient *flumioxazin*.

Encompass may be used as part of a burndown, stale seedbed, fall, early pre-plant or a preemergent application.

Residual tankmix partners include: FirstRate[®], Scepter[®], Sencor[®], Prowl[®] & Pursuit[®]. Burndown tankmix partners include: glyphosate, 2,4-D, Volunteer[®] & Gramoxone Extra[®].

Add R-Way[®] COC @ 1 pint/A for burndown applications with 2,4-D.
 Add Zenith[®] @ 1.5 pounds/A for burndown applications with glyphosate.
