

# N-Serve®

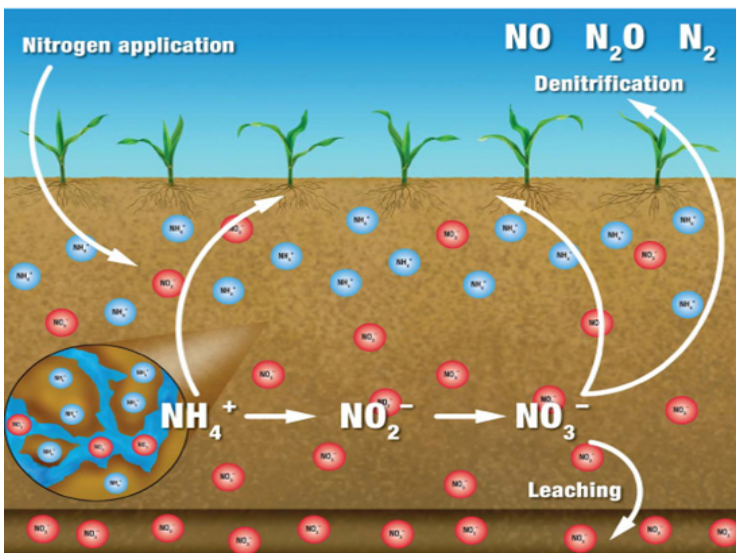

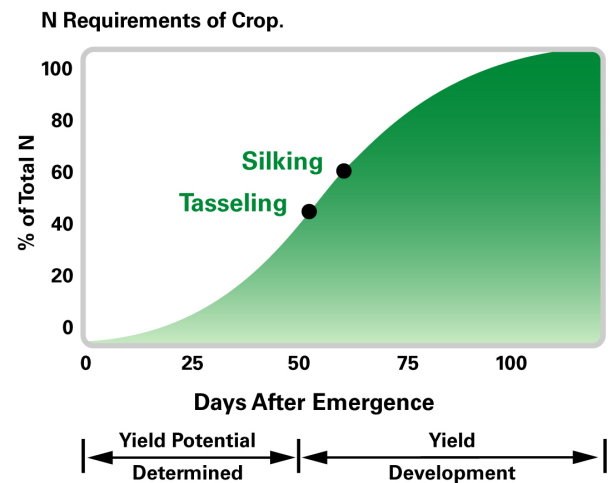

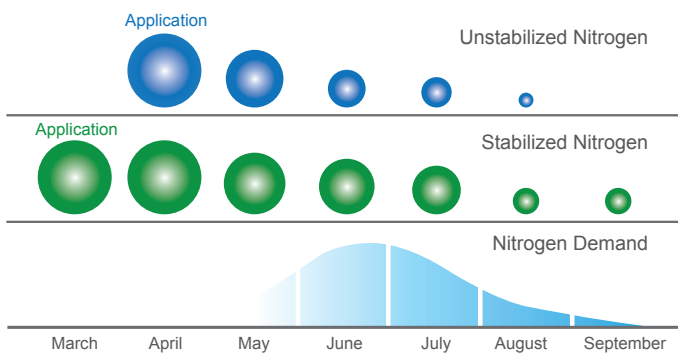

## NITROGEN STABILIZER

### 189 STUDIES SHOW N-SERVE® INCREASES YIELDS 7%

Over the past 36 years, 189 peer-reviewed studies have shown average yield increases of 7% when using N-Serve® with fall applied anhydrous applications.

Other studies also show:

- 5% increased crop yield with spring anhydrous applications
- 28% more nitrogen in the root zone during key growth stages
- 16% less nitrogen leaching from the root zone
- 51% reduction in greenhouse gas emissions

## MAXIMIZE YOUR NITROGEN INVESTMENT WITH N-SERVE®

With N-Serve you'll get these important benefits:

- Application flexibility
- Nitrogen stabilization
- Increased grain protein
- More natural crop dry-down
- Reduced nitrate leaching
- Greater yield potential
