

ACCURATE[®] EXTRA Herbicide—Effective postemergent control of hard to handle weeds

ACCURATE[®] EXTRA Herbicide controls more than 70 broadleaf weeds in wheat, barley, triticale and fallow. A combination product, **ACCURATE EXTRA** contains three active ingredients: thifensulfuron, tribenuron and metsulfuron. This means small grain producers can expect reliable postemergent control of problem weeds such as wild buckwheat, henbit and lambsquarters.

A cost-effective alternative to Ally[®] Extra herbicide, **ACCURATE EXTRA** also has a low use rate and can be tank-mixed with other suitable herbicides to control additional weeds. It can also be tank-mixed or used sequentially with fungicides and insecticides registered for use on cereal crops. Check label for specific products and use rates.

ACCURATE EXTRA is absorbed through the foliage of labeled weeds, rapidly inhibiting their growth. Leaves of susceptible plants appear yellow or white from one to three weeks (three to five weeks for wild garlic) after application.

ACCURATE EXTRA will also provide up to four to six weeks of residual weed control. Susceptible weeds may germinate and emerge shortly after application but growth then ceases. Death of leaf tissue will follow in some weed species, while others will remain green but stunted and non-competitive.

For Use On: Wheat (including durum), barley, triticale, and fallow

Formulation: WDG (water dispersible granule)

Packaging: 20 oz. bottle, 12 per case

Active Ingredients: Thifensulfuron, Tribenuron, Metsulfuron

Mode of Action: ALS Inhibitor

Use Rates: .02 oz. – .04 oz. per acre

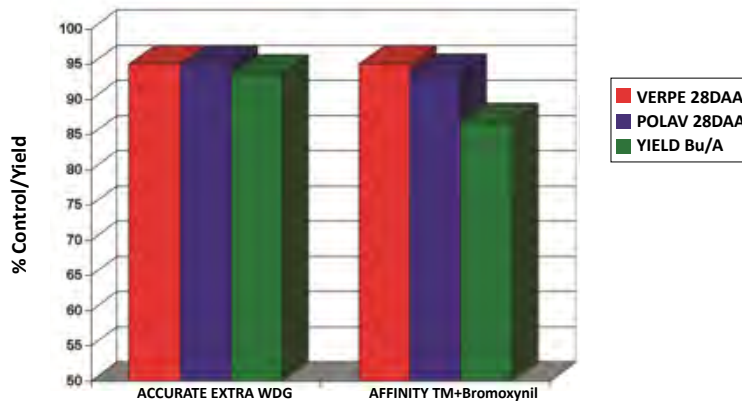

Signal Word: Caution

Weeds Controlled*

- Common buckwheat
- Common ragweed
- Henbit
- Mustards
- Lambsquarters
- Pineapple weed
- Shepherd's purse

**See label for complete listing of controlled weeds.*

Application Information

For best results, apply **ACCURATE EXTRA** to young, actively growing weeds at labeled use rates. The degree and duration of control may depend on the following factors:

- Weed spectrum and infestation intensity
- Weed size at application
- Environmental condition at and following treatment

Consult label for specific direction on application information for other crops, spray additives, re-entry interval (REI) and personal protective equipment (PPE).

For more information about ACCURATE EXTRA Herbicide, contact your local crop protection dealer, visit www.cheminova-us.com or call 800-548-6113.
