

Burndown

DuPont™ Synchrony® XP

herbicide

Replaces 2,4-D LVE at planting

Key benefits

- Replaces 2,4-D LVE at planting, so you don't have to wait to plant.
- Provides an alternate mode of action to glyphosate, which helps deliver more consistent performance on tough-to-control broadleaf weeds.
- Improves burndown control even under cool conditions on marestail, lambsquarters and ragweeds.
- Residual activity to help reduce weed competition for improved planting conditions.
- Affordable tank-mix partner.

Rate recommendation

- DuPont™ Synchrony® XP herbicide 0.75 oz/A
- + glyphosate
 - + NIS 0.25% v/v
 - + AMS 8.5-17 lbs/100 gal

Application information

- Synchrony® XP preplant applications will provide burndown control of certain broadleaf weeds that are <3" tall.
- May be applied up to 30 days before planting or prior to soybean emergence after planting.
- Refer to label for pH soil restrictions for appropriate rate in your area.
- See the glyphosate manufacturer's label for specific ammonium sulfate and surfactant recommendation.
