POWERFUL BROAD-SPECTRUM INSECT CONTROL.

BAYTHROID® XL INSECTICIDE IS THE COMPLETE PYRETHROID

Baythroid® XL offers more flexibility and advantages when compared to standard pyrethroids. Baythroid XL provides fast, effective control of primary and secondary pests—such as budworms, bollworms, weevils, plantbugs, fleahoppers, stink bugs, armyworms (beet and fall), thrips among many others.

BAYTHROID XL DELIVERS:

- One of the broadest pyrethroid use labels on the market
- Consistent and reliable performance on a wide spectrum of insect pests
- Excellent flexibility
  - Lowest restricted entry interval period available
  - Lowest pre-harvest interval available for most crops
  - An EC formulation that allows for maximum pest control and minimal container disposal
  - “Warning” signal word

QUICK FACTS:

- EPA Reg. No: 264-840
- Restricted Use: Yes
- Signal Word: Warning
- Restricted Entry Interval: 12 Hours
- NOI Required: No
- Closed System: No
- Mode of Action: Sodium Channel Modulator

PPE: Coveralls, chemical-resistant gloves (such as barrier laminate or Viton®), shoes plus socks, protective eyewear.

PESTS CONTROLLED

- Alfalfa caterpillar
- Alfalfa looper
- Alfalfa plant bug
- Alfalfa webworm
- Alfalfa weevil
- Army cutworm
- Armyworms (1st and 2nd instar)
- Aster leafhopper
- Bean leaf beetle (growth stage VC-V2)
- Bean leaf webber
- Beet armyworm (1st and 2nd instar)
- Bird cherry-oat aphid*
- Black cutworm
- Blister beetle
- Boll weevil
- Cabbage looper
- Cereal leaf beetle
- Chinch bug
- Click beetles (adult)
- Corn earworm
- Corn rootworms (adult)
- Corn silk fly (adult)
- Cotton aphid
- Cotton bollworm*
- Cotton fleahopper
- Cotton leafminer
- Cotton leaf perforator
- Cotton leafworm
- Cucumber beetles
- Cutworms
- Egyptian alfalfa weevil
- English grain aphid*
- European corn borer*
- Fall armyworm (1st and 2nd instar)
- Flea beetles
- Garden webworm
- Granulate cutworm
- Grape colapsis (adult)
- Grass sawfly
- Grasshopper
- Green cloverworm
- Japanese beetle (adult)
- June beetle (adult)
- Leafhoppers
- Loopers
- Lygus bugs*
- Masked chafer (adult)
- Meadow spittlebug
- Mexican bean beetle
- Pale western cutworm
- Pink bollworm
- Potato leafhopper
- Russian wheat aphid*
- Saltmarsh caterpillar
- Sandhill cutworm
- Silverspotted skipper
- Southern armyworm (1st and 2nd instar)
- Southern corn leaf beetle
- Southern garden leafhopper
- Southwestern corn borer*
- Soybean aphid
- Soybean looper* (supp.)
- Stalk borer*
- Stink bugs
- Tarnished plant bug*
- Threecornered alfalfa hopper
- Thrips
- Tobacco budworm*
- Velvetbean caterpillar
- Webworm
- Western bean cutworm
- Western yellowstriped armyworm (1st and 2nd instar)
- Woollybear caterpillar
- Yellowstriped armyworm (1st and 2nd instar)

† Not all pests are labeled on all crops—please consult the product label for specific use directions and details.

* Please consult the Baythroid XL product label for Insect Resistance Management statement for these pests. Additionally, consult your local or state agricultural authorities, and/or state Cooperative Extension Service agent or agricultural adviser for Insect Resistance Management strategies and recommended insect control methods in your area.

ADDITIONAL INFORMATION:

- Baythroid XL is available in ½ or 1 gallon plastic containers or 15 gallon multi-trip containers (MTC).
- Worker Protection: With Baythroid XL, restricted entry interval (REI) into fields is 12 hours after use—not 24 to 48 hours like some other products.
- Apply by ground, air or chemigation. Be sure to apply the specific dosage in sufficient water for thorough coverage of foliage.

IMPORTANT: This bulletin is not intended to provide adequate information for use of these products. Read the label before using these products. Observe all label directions and precautions while using these products.
