66222-236

GROUP NUMBER

3A

MODE OF ACTION

Sodium channel modulator

TIMING

When pests appear

BRAND ALTERNATIVES

Capture[®], Brigade[®]

RESTRICTED USE

Yes

SIGNAL WORD

Warning

PACKAGING INFORMATION

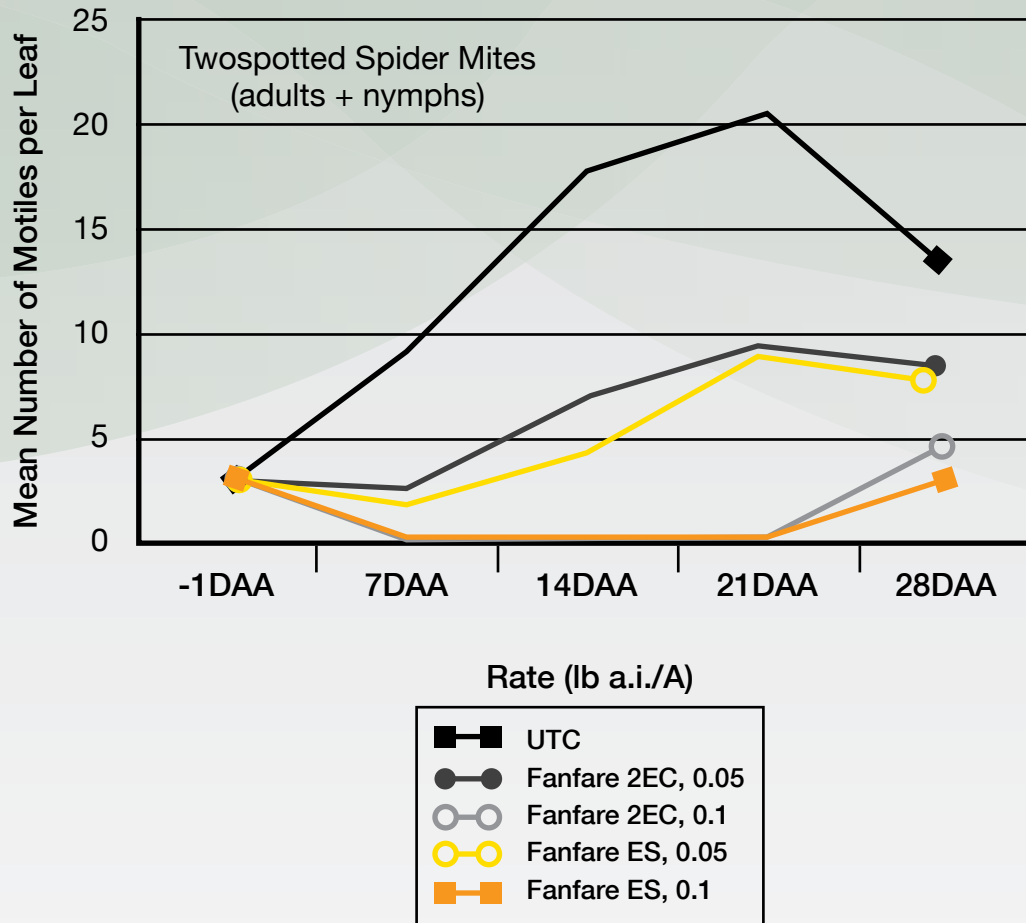

4 X 1-gal, 270-gal

KEY FEATURES AND BENEFITS

- **Performance equal to Fanfare[®] 2EC:** Confidence in control and return on investment
- **Significantly less odor versus ECs:** Improves user experience and enhances flexibility of use around sensitive areas
- **Better tank-mix compatibility versus ECs:** Ease of use through more tank mix choices
- **Broad crop and pest label:** Simplifies requirements for multiple products
- **Complies with clean air standards:** Comfort in regulatory sustainability

See the product label for complete use directions and instructions.

Fanfare ES and Fanfare 2EC
 Mite Control on Field Corn
 Ron Kukas, TRACS, Visalia, Calif., 2008

Sprayed 7/25/08; sprayed with CO2 backpack sprayer; 40 GPA; spray boom setup to direct spray toward the bottom of the corn leaves; corn was approximately 18" tall; no phytotoxicity observed on foliage at 7 DAA

QUALITY PRODUCTS. COMPETITIVE PRICES.

MANA's proven insecticides, fungicides, herbicides, PGRs and harvest aids are manufactured to the highest standards and value priced to optimize the farm's profitability. MANA provides best-in-class formulations, regulatory capabilities, extensive field testing and research, and a science-based approach to defend and maintain vital active ingredients. Our area business management teams throughout the U.S. support the distributors, retailers, crop consultants and agronomists who are part of the supply chain today's producers and farm managers rely on for localized expertise.
