

Picloram & 2,4-D Amine Herbicide

GunSlinger™ is formulated specifically to control troublesome but susceptible broad-leaf weeds and woody plants.

Labeled Use Sites

- Rangeland
- Permanent pastures
- Conservation Reserve Acres

Key Benefits

- Provides both foliar and soil activity to control many troublesome weeds
- Can be applied using ground or air equipment
- No grazing restrictions for non-lactating dairy cattle or other non lactating livestock
- Dairy cattle can graze after only 7 days

Product Stewardship: Surface runoff and off target drift of GunSlinger® may contaminate surface water and leeching may contaminate groundwater. Since GunSlinger® is a restricted use pesticide product stewardship is critical.

Active Ingredients:

Picloram	10.2 %
2,4-D Amine	39.6%
Other Inert Ingredients	<u>50.2%</u>
Total	100 %

Contains .54 pounds of picloram and 2 pounds of 2,4-D amine per gallon

Always read and follow directions on the label

RESTRICTED USE PESTICIDE

May injure (phytotoxic) susceptible, non-target plants. For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification. Commercial certified applicators must also ensure that all persons involved in these activities are informed of the precautionary statements.

GunSlinger™ is not registered for use in every state. Please check with Albaugh Inc. or your local State Agency for product registration status. **EPA Reg. No. 42750-80**

Southwest, Southeast, and Mid-Atlantic States

Weeds Controlled	Rates per Acre
Annual broomweed	1-4 pints
Bitter sneezeweed	1-4 pints
