

DuPont™ Resolve® Q

herbicide

Shift your corn herbicide program into overdrive before or after planting

Preplant and Early POST

DuPont™ Resolve® Q tank mixed with atrazine-containing corn herbicides delivers:

- Additional contact plus residual control of tough grass and broadleaf weeds before or after planting, including triazine-resistant lambsquarter.
- Built-in safener technology, represented by the “Q,” that provides corn growers with the flexibility to confidently apply Resolve® Q herbicide even after corn emergence.
- Faster, more consistent burndown than glyphosate alone, plus residual to get your corn herbicide program off to a strong start.
- An additional mode of action to help minimize the occurrence of certain herbicide-tolerant weeds.

Application information

- Apply Resolve® Q preplant incorporated, preemergence or preemergence burndown to field corn, tank mixed with full or reduced rates of other products registered for use in corn.
- The addition of crop oil concentrate or methylated seed oil is recommended for burndown of labeled weeds.
- Adequate soil moisture is required for optimum activity. Rainfall within 5 to 7 days after application will enhance Resolve® Q residual activity.
- Do not apply as a fallow or preemergence treatment to coarse textured soils (sand, loamy sand or sandy loam) with less than 1% organic matter.

For more information

To learn more about DuPont™ Resolve® Q herbicide, contact your local DuPont retailer or DuPont representative. And visit us on the Web at resolve.dupont.com.

One-Pass Program

Resolve® Q¹ 1.25 oz/A
+ appropriate rate of DuPont™ Breakfree® or Cinch® atrazine-containing brand herbicide (weeds and grasses 1-2" tall)
+ Abundit® Extra herbicide (glyphosate)* (weeds and grasses exceeding 2")

Two-Pass Program

Resolve® Q¹ 1.25 oz/A
+ Abundit® Extra* as needed
+ atrazine as needed
Followed by
Resolve® Q¹ 1.25 oz/A
+ Abundit® Extra* as needed

¹ When making applications of Resolve® Q, do not apply more than 1 oz active ingredient rimsulfuron/A during the crop year.
* Refer to the Abundit® Extra label for specific AMS and surfactant recommendations.

Weeds controlled by DuPont™ Resolve® Q herbicide + glyphosate

When used in a tank mixture with a glyphosate herbicide, 1.25 ounce of Resolve® Q will add improved burndown and/or residual activity on the following weeds:

Alfalfa, volunteer
Barley, volunteer
Barnyardgrass
Bluegrass, annual
Buckwheat, wild
Chamomile, false
Chickweed, common
Cocklebur
Crabgrass
Dandelion (6" diameter)
Filaree, redstem
Foxtail: bristly, giant, green, yellow
Henbit
Johnsongrass, seedling
Kochia
Lambsquarters, common
Millet, wild proso
Morningglory, ivyleaf
Mustard: birdsrape, black, wild

Nightshade, hairy
Nutsedge, yellow
Oat, wild
Panicum, fall
Pigweed: prostrate, redroot, smooth
Purslane, common
Quackgrass
Radish, wild
Ragweed, common
Ryegrass, Italian
Sandbur: field, longspine
Shepherd's-purse
Signalgrass, broadleaf
Smartweed, Pennsylvania
Stinkgrass
Thistle, Canada
Velvetleaf
Wheat, volunteer

Abundit® is not available in all states. See your local DuPont retailer or representative for availability in your state. Atrazine, Breakfree® ATZ, Breakfree® ATZ Lite, Cinch® ATZ and Cinch® ATZ Lite are restricted-use pesticides.
