

SALVO®

Burndown Herbicide

SALVO® is the premium phenoxy herbicide that provides superior broadleaf weed control in corn, small grains, grass pastures, rangeland and other uses.

PRODUCT FEATURES:

- Unique Emulsification System
- Highly Refined Acid Formulation
- Broad Spectrum Weed Control
- Excellent Crop Safety
- Better Tank-mix Compatibility
- Low Use Rate
- Wide Window of Application
- Economical

ACTIVE INGREDIENTS:

Isooctyl ester of 2,4-Dichlorophenoxyacetic acid
 Contains 5 lbs. 2,4-D acid per gallon

PRODUCT BENEFITS:

- Quicker Weed Kill
- Consistent Crop Safety
- Controls Over 90 Broadleaf Weeds
- Protects Maximum Yield Potential
- Ease of Use
- Less Product to Handle
- Time Management of your Operation
- Cost Savings for your Operation

ADJUVANT RECOMMENDATION:

Optimize Weed Control, but only conditions when crop injury is not a concern.

Control Drift

Application Rate

Rates of 6.4 to 12.8 oz per acre will be suitable for most situations. Rate ranges vary greatly depending on crop, application timing, and target weeds.

*Labeled Crops

Corn (Field, Sweet, and Pop), Sorghum, Wheat, Barley, Oats, Rye, Fallow, Crop Stubble, Soybeans, Grass Pastures, Grass Seed Crops, Rangeland, Forest Management, Turf, and Non-crop areas. *See label for specific instructions.
