

Herbicide

Sword

“WITH THE POWER OF SWORD, WHY HAUL AROUND MORE”

Product Overview

SWORD® is a concentrated, premium methyl phenoxy ester (MCPA) herbicide that maximizes crop safety, controls a wide range of broadleaf weeds and is an ideal tank mix partner for small grains, flax, rangelands, pastures, turf and other crop and non-crop uses.

Advantages of Sword

Superior to 2,4-D on mustard, thistle, hoary cress (white top), poison hemlock, and hempnettle. Reduces Canada thistle competition more effectively than other phenoxyes because **SWORD** can be applied earlier to wheat, barley or rye.

User-friendly, concentrated, formulation requires less product per acre, which reduces handling, mixing, freight costs and storage requirements.

Wide window of application extends application timing.

Compatible and easily tank mixed with many other herbicides, insecticides and liquid nitrogen solutions.

Rainfast in one hour.

Active Ingredients:
Methyl Phenoxy Ester (MCPA)

DIRECTIONS FOR USE

CROP: wheat, oats, barley, rye, established grasslands and pastures, grasses grown for seed, lawns, golf courses and other established turf areas, flax, rangeland and timber lands.

NON CROP: fencerows, roadsides, rights-of-way, and others.

Recommended Adjuvant:
