

Product Overview

Cadence Lite ATZ is a residual soil applied herbicide used to consistently and effectively control grasses and broadleaves in corn, primarily in areas where atrazine use is restricted or a lower rate is desired.

<i>Features</i>	<i>Benefits</i>
Broad spectrum weed control	Controls over 40 weeds including small seeded broadleaves and many annual grasses (foxtail, fall panicum, crabgrass, waterhemp, nightshade, lambsquarters and many more)
Good residual activity	Eliminates expensive trips across the field
Wide window of application	Puts you in charge of weed control timing
Excellent tank mix partner	Can be tank mixed with burndown herbicides and liquid fertilizer

Application info

- Early preplant- up to 30 days before planting
- Preplant surface or incorporated- within 14 days of planting
- Pre-emerge- incorporate if sufficient rainfall does not occur within 7 days
- Early post- corn up to 11 inches tall

Active Ingredients:

acetochlor: 2-chloro-2'-methyl-6'-ethyl-N-ethoxymethylacetanilide 43.4%

atrazine:[2-chloro-4(ethylamino)-6-(isopropylamino)-s-triazine and related triazines 16.3%

Use Rates in Conventional Tillage Systems
Table 2: Cadence* Lite Atz Use Rates (qt/acre) by Soil Texture and Organic Matter Content in Conventional Tillage Systems.

The following use rates are for preplant incorporated, preemergence, and early postemergence applications (see specimen label- Application Timing and Methods). Consult Table 3 (specimen label) if no-till applications are made or the product is applied more than 14 days prior to planting under conventional tillage.

Soil Texture	Soil Organic Matter Content	
	Less than 3%	3% or Greater
Coarse	1.6- 1.8	1.8 - 2.0
Medium	1.8 - 2.1	1.9 - 2.1
Fine	1.9 - 2.2	1.9 - 3.0

CADENCE LITE ATZ IS A RESTRICTED USE PESTICIDE. ALWAYS READ AND FOLLOW LABEL DIRECTIONS AND SAFETY PRECAUTIONS.
