# Postemergence control in a glyphosate-tolerant soybean program

## DuPont™ Classic® herbicide

### DuPont™ Classic® herbicide delivers:

- Residual activity to help keep fields clean.
- Improved control of key weeds, such as morningglory, hemp sesbania, yellow nutsedge, dandelion and velvetleaf, when compared to using glyphosate alone.
- Excellent tank-mix partner with other postemergence soybean products to expand the weed control spectrum.

### Rate recommendation

Classic® herbicide 0.25–0.33 oz/A  
 + Abundit® Extra herbicide (glyphosate)

### Application information

- For best control of morningglories and dandelion, a higher rate of Classic® is recommended.
- Refer to the Abundit® Extra (glyphosate) label for specific ammonium sulfate and surfactant recommendations.
- Classic® may be applied anytime after the first trifoliolate has opened but no later than 60 days before soybean maturity.
- Classic® may be tank mixed with DuPont™ Asana® XL insecticide for control of soybean aphids (except in California), bean leaf beetles and many other insects. Refer to label for use with other insecticides.

Weeds controlled by Classic® 0.25–0.33 oz/A + glyphosate\*

Weeds	Maximum height (in inches)	Weeds	Maximum height (in inches)
Barnyardgrass	6	Panicum: fall, Texas	10
Cocklebur	8	Pigweed: redroot, rough	12
Corn, volunteer	20	Pigweed, other	8
Crabgrass species	10	Ragweed: common, giant	8
Dandelion	4	Sesbania, hemp	4
Foxtail species	10	Sicklepod	4
Jimsonweed	10	Sida, prickly	4
Ladysthumb	8	Signalgrass, broadleaf	4
Lambsquarters	6	Smartweed, Pennsylvania	8
Morningglory: entireleaf, ivyleaf, pitted, tall	4	Spiderwort, tropical**	2
Nightshade, eastern black	5	Sunflower	8
Nutsedge, yellow	6	Velvetleaf	4

\* Equivalent of 1 qt/A of 4 lbs/gal glyphosate.

\*\* Classic® at 0.5 oz/A + glyphosate will suppress tropical spiderwort that is no larger than 2 inches in size.
