

# ***Pramitol*<sup>®</sup> 25E** **HERBICIDE**

Pramitol<sup>®</sup> 25E is a non-selective herbicide that works by killing the leaves and root systems of grasses and other perennial weeds.

Pramitol 25E is a total weed control herbicide and should be used only where barren soil is desired. Use along fence lines, buildings, work yards and anywhere you need complete weed control.

## Specifications

- Bare ground weed control
- Active Ingredient: Prometon - 25%
- Non-selective herbicide
- Kills weeds pre and post emergence
- Absorption of Pramitol<sup>®</sup> through the foliage and roots kills weeds, grasses and all plants
- Dry soils can prohibit movement of herbicide to the roots and produce poor weed control
- Pramitol<sup>®</sup> 25E will leave behind sterile soil for up to one year to prevent new weed growth
- For use where you want bare soils
- 1 Gallon can treat up to 10,000 sq. ft.
- Use as directed for complete weed control
