

Count on DuPont to get started now for a clean spring seedbed

DuPont™ Basis® Blend

herbicid

Fall-applied DuPont™ Basis® Blend herbicide delivers:

- A better formulation that is easier to handle, mix and clean out of the spray tank.
- Reliable broad-spectrum burndown plus residual control of tough winter annuals and certain perennials, even under cool conditions.
- Diminished weed cover that allows your no-till and reduced-till fields to be ready with earlier planting potential, since soils warm up faster.
- Reduced number of springtime tillage passes required to prepare a suitable seedbed on conventional-tillage fields.

Application information

- Apply anytime after harvest, but before ground freeze-up.
- Basis® Blend can be applied with liquid nitrogen fertilizer if first slurried in clean water.
- Basis® Blend may be tank mixed with other herbicides labeled for fall application.

Rate Conversion Chart Product/Acre (ounces)		
Basis® (75DF)	Basis® Blend	Approximate acres/ 50 oz bottle
0.33	0.825	60
0.50	1.25	40
0.67	1.65	30

Rate recommendation

For fields going to corn

Basis® Blend 1.25 oz/A

- + 2,4-D LVE 1.0 pt/A
- + COC 1% v/v
- + Abundit® Extra herbicide (glyphosate) (for winter annual grasses greater than 1 inch)

For fields going to soybeans

Basis® Blend 0.825 oz/A

- + 2,4-D LVE 1.0 pt/A
- + COC 1% v/v
- + Abundit[®] Extra (glyphosate) (for winter annual grasses greater than 1 inch)

In all registered states, the rotation interval is 15 days to soybeans when using 0.825 ounce per acre and 30 days to STS® soybeans when using up to 1.25 ounces per acre.

Basis® Blend 1.25 oz/A

- + 2,4-D LVE 1.0 pt/A
- + COC 1% v/v
- + Abundit® Extra (glyphosate) (for winter annual grasses greater than 1 inch)

In the states of Kansas and Oklahoma, the counties containing HWY 81 and east, and in Missouri, (excluding the Bootheel), Illinois, Indiana, Ohio and West Virginia, the counties that contain I-70 and south and the states of Delaware, Maryland and Virginia, the rotation interval is 60 days to soybeans and 30 days to STS® soybeans.

The use of soil-active ALS herbicides contained in products such as Autumn brands, Corvus, Capreno, Surestart or TripleFLEX in the previous crop or prior to planting soybeans in the current cropping year may impact soybean tolerance to Basis® Blend. Any such use will be at your own risk. Consult product labeling, DuPont technical bulletins/information updates or contact your local DuPont representative for further information.
