

NUANCE[®] Herbicide—Preplant and post-harvest burndown plus effective postemergent control of broadleaf weeds

Nuance[®] Herbicide controls numerous broadleaf weeds in wheat, barley, triticale and fallow. A postemergent herbicide, **NUANCE** may also be used for post-harvest and preplant burndown programs. It contains the active ingredient tribenuron and is an inexpensive alternative to Express[®] herbicide providing outstanding control of weeds such as common purslane, lambs-quarters and field pennycress.

For additional flexibility, **NUANCE** may be mixed with other registered herbicides including 2,4-D and MCP for resistance management and expanded weed spectrum control programs. Please refer to the product label for specific crops and use rates.

NUANCE is absorbed through the foliage of labeled weeds, rapidly inhibiting their growth. Leaves of susceptible plants appear yellow or white from one to three weeks after application.

For Use On: Wheat, barley, triticale and fallow

Formulation: WDG (water dispersible granule)

Packaging: 10 oz. bottle, 8 per case

Active Ingredient: Tribenuron

Mode of Action: ALS Inhibitor

Use Rates: 0.17 oz. – 0.33 oz. per acre

Signal Word: Caution

Weeds Controlled*

- Common purslane
- Field pennycress
- Lambsquarters
- Miner's lettuce
- Pineapple weed

**See label for complete listing and additional weeds controlled with tank-mix partners.*

Application Information

For best results, apply **NUANCE** after the crop is in the 2-leaf stage, but before the flag leaf is visible. For fallow and postemergent burndown, apply the product to weeds up to 3 inches in height. For post-harvest burndown, apply **NUANCE** to crop stubble, please see the application timing section of the label for restrictions on planting intervals. The degree and duration of control of weeds may depend on the following factors:

- Weed spectrum and infestation intensity
- Weed size at application
- Environmental condition at and following treatment

Consult label for specific direction on spray additives, re-entry interval (REI) and personal protective equipment (PPE).
