

A selective weed killer for control of many broadleaf weeds and brush. For control in corn, small grains and non-crop areas.

Weeds Controlled

Bindweed Buckwheat
Bull thistle Carpetweed
Canada thistle Chickweed
Cocklebur Sowthistle
Fiddleneck Lambsquarter
Ragweed Musk thistle

(Read label for additional broadleaf weeds controlled)

Recommended Application Rates

Small Grains (wheat, barley, oats, rye)

Spray when weeds are small after grain begins to tiller but before boot stage. (Usually 4 to 8 inches tall)

Annual weeds: ½ to 1 pint per acre

Perennial weeds: 1 pint per acre

· Preharvest: 1 to 2 pints per acre

Oats

Spring: ½ pint per acre

• Fall: 1/4 to 1-1/4 pints per acre

Corn (Field and Sweet)

Postemergent: apply when weeds are small and corns in 5 to 18 inches tall. When corn is over 8 inches tall use drop nozzles.

Preemergent: 1 to 2 quarts per acre

Postemergent: ½ pint per acre

Preharvest: 1 to 2 pints per acre

Sorghum (Milo)

For postemergent control apply when crop is 4 to 12 inches high with secondary roots. Use drop nozzles when crop is over 10 inches high. Do not apply from flowering to dough stage. Use ½ to ¾ pints per acre, and up to 1 pint for some hard to control weeds.

Pasture and Rangeland

Established Pastures and Rangeland: Use 1 to 4 pints of product in sufficient water to give good coverage. Use only on established stands of perennial grasses.

- Do not graze dairy cattle within 7 days of application.
- Do not apply product within 30 days of cutting grass for hay.
- Remove meat animals from treated area 3 days prior to slaughter.

Other labeled uses:

Bindweed Buckwheat
Bull thistle Carpetweed
Canada thistle Chickweed
Cocklebur Sowthistle
Fiddleneck Lambsquarter
Ragweed Musk thistle

Application

Ground Application

Apply in 5 to 25 gallons of water

Aerial Application

Apply only when there is no danger of drift. Apply in 2 to 10 gallons of water.

Always read and follow label directions.
