

Control of Volunteer Cotton Field Corn, Grain Sorghum

Aim® - Volunteer Glyphosate Tolerant Cotton Control

Field Corn

- **Use Rate:** 1.5 to 2.0 oz/a plus COC at 1 gal/100 gals of spray solution.
- Apply with drop nozzles or other sprayer capable of directing the spray away from the whorl of the corn plant.

Grain Sorghum

LC-03-01SR-06/09

- Use Rate: 1.0 oz/a plus COC at 1 gal/100 gals of spray solution.
- Apply with drop nozzles or other sprayer capable of directing the spray away from the whorl of the sorghum plant.

Application Guidelines

- For optimum performance, make application to actively growing volunteer cotton up to 4 inches
- Coverage is essential for good control, 10 GPA label minimum
- **15-20 gpa recommended**, especially when volunteer cotton is large (over 6 inches).
- Do not apply within 3 days of harvest
