

## START WITH AUTUMN™ SUPER FOR CLEANER FIELDS WITH FEWER RESISTANT WEEDS.

AUTUMN™ SUPER HAS AN ALTERNATIVE MODE OF ACTION TO GLYPHOSATE THAT CAN HELP COMBAT GLYPHOSATE-RESISTANT WEEDS IN CORN AND SOYBEANS.

- Labeled for use prior to planting field corn, sweet corn, popcorn or soybeans.
- Fall or early spring is the best time to control winter annuals, biennials and perennials.
- Autumn Super provides burndown of emerged weeds with residual.
- Larger winter annuals need higher rates of burndown herbicides in spring.
- Clean fields are less likely to attract black cutworm moth, and they won't support nematodes and grubs.
- · Weeds keep ground wet under moist conditions.
- Weeds use valuable nutrients to grow.
- A clean seedbed means quicker crop emergence in warmer soils.
- Many popular herbicide programs contain no residual and lack the power to keep winter annuals from emerging.
- Weed seed bank will continue to increase if left unchecked.

## **APPLICATION: TIMING AND RATES**

- Flexibility in application fall through spring burndown.
- Best weed control will be achieved with a fall application following crop harvest, after weed emergence and prior to ground freeze.
- In early spring, apply at least 60 days prior to planting soybeans, 30 days prior to planting field corn, and 3 months prior to planting wheat (spring and winter).
- Takedown of the toughest fall weeds like dandelion and marestail.
- Flexibility in tankmix partners 2,4-D, metribuzin, dicamba, glyphosate, etc. Always add a tankmix partner
  for broader spectrum or additional residual weed control. Increased grass control is especially noted with
  glyphosate tankmixtures.\*
- Low use rate of 0.3 to 0.5 oz/A.
- Adjuvant: Crop Oil Concentrate 1% v/v and a nitrogen fertilizer such as UAN or ammonium sulfate.

## **WEEDS CONTROLLED**

Field Pansy	Purple Deadnettle
Field Pennycress	Redroot Pigweed
Hemp Nettle	Scentless Chamomile
Henbit	Shepherdspurse
Horsenettle	Tansy Mustard
Italian Ryegrass***	Turnip Weed
Little Barley***	Volunteer Canola
Marestail (including glyphosate-resistant)	Wild Carrot
Mouse-eared Chickweed	Wild Garlic***
Pennycress	Wild Mustard
Pokeweed***	Wild Radish
	Field Pennycress Hemp Nettle Henbit Horsenettle Italian Ryegrass*** Little Barley*** Marestail (including glyphosate-resistant) Mouse-eared Chickweed Pennycress

Poison Hemlock
