

# Superior Rootworm Control

with

# AZTEC®

**AZTEC®**  
**2.1 G**

**AZTEC®**  
**SmartBox® 4.67 G**

## Consistent control of all species of rootworm and other corn soil pests, too.

- Controls all species of corn rootworm (Northern, Western, Southern, Mexican)
- Also controls cutworm, wireworm, white grub, seedcorn maggot and seedcorn beetle.
- Helps increase yield potential when used on rootworm-traited corn.
- Available in two formulations to fit your needs: AZTEC 2.1 G in 50 lb. bags — AZTEC 4.67 G in the SmartBox System.

**AZTEC** delivers the consistent rootworm and secondary pest control you need to get the most out of your corn rootworm trait hybrids as well as Non-GMO hybrids. In university trials, corn soil insecticides from AMVAC have helped boost yields by an average of nearly 10 bushels per acre on root-worm traired corn. Effective in both T-band and in-furrow applications and with AZTEC, you don't have to worry about herbicide interaction. Get the most out of every acre with the "Granular Advantage" from AZTEC insecticide.

### USE RECOMMENDATIONS

CROPS	PESTS	RATES
Field Corn	Corn rootworm larvae	AZTEC 2.1 G: <b>6.7 ounces</b> per 1000 feet of row (Do not apply more than 7.3 pounds Aztec®2.1G per acre per crop season).
Sweet Corn	Cutworms	
Popcorn	Wireworms	
Seed or Silage Corn	Seedcorn maggot	AZTEC 4.67 G: <b>3.0 ounces</b> per 1,000 feet of row (Do not apply more than 3.27 pounds AZTEC 4.67 G per acre per crop season).
	Seedcorn beetle	
	White grubs
