

# PERFORMANCE...

without Leci-Tech

## << DRIFT REDUCTION

LECI-TECH® products not only reduce driftable fines, but does so without increasing the number of “too large” droplets.

## DROPLET RETENTION >>

LECI-TECH products ensure that more droplets hit the target and stay there to provide more consistent control.

*White clay solution was used as a visual marker.*

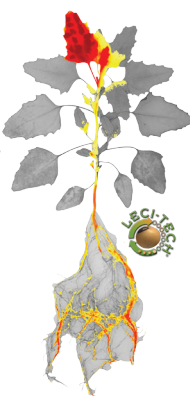

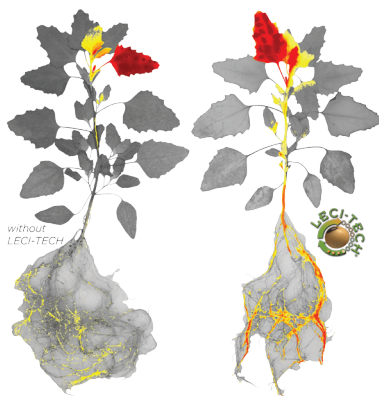

without LECI-TECH

## << PENETRATION

LECI-TECH products provide quicker uptake with no impact on crop safety to maximize pesticide and nutritional product performance.

*The red color indicates amount of glyphosate solution taken into the plant.*

## ...MADE EASY!

# LI 700®

LI 700® with LECI-TECH combines superior penetrating characteristics and pH reduction without sacrificing crop safety. In addition LI 700 provides superior drift reduction and droplet retention.

### Best in class!

- Drift reduction
- Droplet retention
- Penetration
- pH reduction

### Application Information:

1 to 2 quarts per 100 gallons

**Mixing Order:** LI 700 should be added to the tank LAST!

**Target Chemistries:** weak acid herbicides (i.e. ALL glyphosate formulations, 2,4-D, dicamba, etc.), insecticides, defoliants and nutritionals.
