

# Thunder Master™

Premixed Imazethapyr and Glyphosate Herbicide

Thunder Master™ herbicide is labeled for pre-emergence use on conventional and post-emergence Roundup Ready® soybeans.

## Key Benefits of Thunder Master™

- Provides residual control of yield robbing weeds when your planned glyphosate application is delayed.
- May reduce the reliance on expensive sequential glyphosate applications.
- Thunder Master™ provides burndown and residual control of labeled weeds in soybeans when applied prior to planting.
- Thunder Master™ can provide season long weed control when applied post emergence to Roundup Ready® soybeans.
- Effective control of difficult weeds common to no-till production including marestalk.
- Thunder Master™ mixes easily with 2,4-D for additional burndown weed control.

## Active Ingredients:

Imazethapyr	1.8 %
Glyphosate	22.0 %
Other Ingredients	<u>76.2 %</u>
<b>Total</b>	<b>100 %</b>

## Always read and follow label directions

Thunder Master™ is not registered for use in every state. Please check with Albaugh Inc. or your local state agency for product registration status
