

A NEW WEAPON FOR YOUR ARSENAL.

SUNFLOWER FACT SHEET

PREEMERGENCE CONTROL OF TOUGH BROADLEAF WEEDS AND GRASSES.

BroadAxe™ herbicide is a new, powerful weapon in the fight against weeds. It arms growers with preemergence control of tough broadleaf weeds like kochia and pigweeds, and grasses like foxtails. BroadAxe combats weeds with binary technology, eliminating them before you plant, and keeping them away while your crops grow. For no-till and conventional till sunflower fields, there is no tougher herbicide to take to battle.

- Broad, consistent control of several key weeds
 - Kochia (Triazine and ALS resistant)
 - Green and yellow foxtails
 - Pigweeds
 - Common lambsquarters
 - Barnyardgrass
 - Russian thistle
 - Palmer amaranth
- Lower use rate compared to traditional grass PRE herbicides
- Flexible formulation for easy mixing with other herbicides
- Does not need incorporation

USAGE RATES AND APPLICATION TIMING

BroadAxe™ Herbicide Use Rate (Sunflowers)

Preemergence and Preplant Incorporated Applications

Broadcast Rate	Fl oz BroadAxe Herbicide per acre		
	Soil Texture		
% Organic matter	Coarse	Medium	Fine
< 1.5	19.0 - 21.0	19.0 - 25.0	21.0 - 30.0
1.5 - 3.0	19.0 - 25.0	21.0 - 32.0	25.0 - 32.0
> 3.0	21.0 - 25.0	25.0-32.0	32.0 - 38.7

- Use from 19 to 38.7 oz/A depending upon soil type. See label for more details.
- Preemergence or early pre-plant up to 14 days prior to planting. Rain fall is required for activation.
- At least 0.5-1 inch of rain is needed or the product will be inconsistent. Does not need incorporation.
- For soils with ph > 7.2 use the lowest rate for that specific soil texture and organic matter.
